## Subject: Precautionary Measures for HMPV Virus - Protecting Our School Community

Dear Parents and Guardians,

07/01/2025

I hope this letter finds you and your family in good health. We are writing to inform you about the recent concerns regarding the Human Metapneumovirus (HMPV), a respiratory virus that is currently circulating in several regions.

HMPV can cause symptoms similar to the common cold, such as a runny nose, cough, fever, and sometimes wheezing or difficulty breathing. While most people recover with supportive care, certain individuals, especially young children, the elderly, and those with weakened immune systems, may be more vulnerable to complications.

As part of our ongoing commitment to the health and safety of all students and staff, we are implementing a series of precautionary measures to reduce the risk of transmission within our school community. We kindly ask for your cooperation in supporting these efforts.

### Measures Being Taken:

1. **Increased Hygiene Protocols:** We are ensuring that students and staff are regularly washing their hands, especially after coughing or sneezing, and are encouraged to use hand sanitizers available throughout the school.
2. **Enhanced Cleaning Procedures:** Our custodial team is intensifying cleaning efforts, particularly in high-touch areas such as desks, door handles, and shared equipment.
3. **Monitoring Symptoms:** We will be vigilant in monitoring any symptoms related to HMPV among students and staff. If a student shows signs of illness, they will be sent home promptly.
4. **Communication and Awareness:** We are educating students about respiratory hygiene, including the importance of covering coughs and sneezes with tissues or elbows and avoiding sharing personal items.

### What Parents Can Do:

1. **Monitor Your Child's Health:** Please keep an eye out for any signs or symptoms of illness, including cough, fever, runny nose, or difficulty breathing. If your child is feeling unwell, **it is advisable to keep them at home to prevent spreading any potential illness.**
2. **Encourage Good Hygiene Practices:** Please remind your child about the importance of hand washing and covering their mouth when coughing or sneezing.
3. **Notify Us if Your Child is Unwell:** If your child is diagnosed with HMPV or any other contagious illness, please send your ward after cure with mask for few days to avoid potential spreading.
4. We appreciate your support in helping us keep our school environment safe and healthy. Together, we can work to minimize the risk of illness and ensure the well-being of all students ,staff and society in general
5. Guidelines if any from government will be followed in future.

Thank you for your cooperation.

Warm regards,

PRINCIPAL
